**Innovative Panel Technologies is a leader in developing panels for a broad range of settings and markets. Indoor or outdoor applications, load capacity needs, heavy use, fire resistance, painted, edge finishing, custom machining or routing — whatever your needs IPT can meet them.**

With decades of experience, the hallmark of Innovative Panel Technologies (IPT) business is to create custom panel solutions for specialized applications. That focus has resulted in panels that comply with ADA guidelines for slip resistance, structural insulated panels (SIPS panels), furniture, transportation, storage facilities, agriculture-related items, and a long list of proprietary, custom developed panels for a range of industries and applications.

IPT's extensive knowledge and understanding of laminates, face materials and substrate options provide the most complete offering of custom panel solutions and value added services available anywhere.

I-Tech Custom panels can be produced with a variety of substrates/core materials, overlays and value added services. Some examples are:

### Custom Panels Materials Options

- Plywood
- Particleboard
- MDF
- OSB
- Foam
- Honeycomb Paper, Plastic, Aluminum
- Aluminum Composite Panel (ACP)
- Polypropylene (PP)
- High Density Polypropylene (HDPE)
- ABS
- ASA (Exterior rated plastic)
- FRP (Fiberglass Reinforced Plastic)
- HPL (High Pressure Laminate)
- Steel
- Composite (Wood free)
- PVC (Vinyl)

### Custom Services Options

- Cut to Size
- Custom CNC Routing
- Tongue & Groove
- Precision Sanding
- Painting
- Custom Treatments (fire retardant, antimicrobial, preservative)
- Anti-static Additive
- UV stabilizer
- Color Matching
- Custom Colors

*IPT offers the capability to do custom CNC router work from pre-bored fastener holes to more complex patterns such as lettering.*

*Experienced employees at the production facilities handle all aspects of custom panel production.*

## Custom Panels & Services™

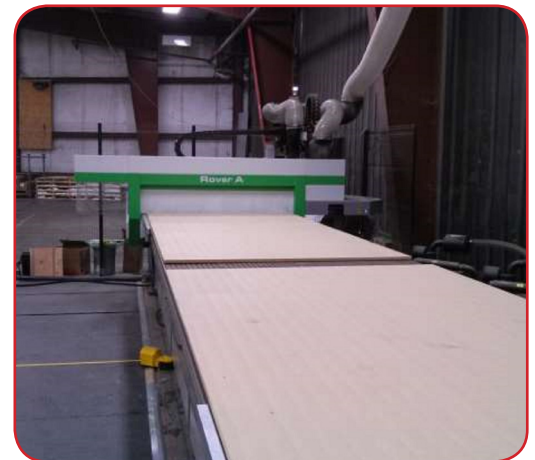

### Why IPT?

Innovative Panel Technologies, Inc. is committed to solutions. Our expertise rests in our ability to tailor a panel solution to our customer's application. From plywood products, wood paneling and laminate wood floors to wood-free composites, mezzanine flooring, portable stages and bleacher repair materials, we are specialists who take great pride in solving difficult applications, creating new products and applying existing technologies to new settings.

- **Experience is the difference.** With hundreds of installations across dozens of industries and applications, Innovative Panel Technologies wields uncommon expertise in meeting the demands of any panel-related project.
- **Tailored solutions.** IPT delivers tailored products designed expressly to meet your project needs. Elements like span requirements, fire retardant ratings, weight, wear, surface texture, tolerances, strength and longevity are all a part of the panel solution we develop on your behalf.
- **Budget parameters.** With so many material solutions available to IPT we can meet most any budget with precisely the right material for the application. You'll find our wide range of panel options and purchasing strength provides substantial cost benefits over comparable products.
- **Design Services.** IPT offers CAD design services for project layout and panel ordering. Contact IPT directly for detailed information.
- **Shipping always at net cost.** IPT mitigates your shipping costs by charging their net cost to ship to you. Our net cost shipping policy is your assurance you're getting the best buy on IPT products.
- **Customized panel options.** IPT takes pride in delivering exactly what you need. We can provide custom panel solutions that address specific requirements for materials, sizing, coatings, finishing options or applications.
- **Anti-Static Option.** For commercial/industrial environments that require anti-static materials to protect against uncomfortable and potentially hazardous electro static discharge. Innovative Panel Technologies, Inc. has developed I-Tech Anti-Static Panels for these specific applications. Please contact IPT directly for complete and detailed information on these products.

*IPT offers a wide array of panel constructions to meet the needs of your application.*

*Each panel produced to IPT's specifications receives individualized attention to ensure your needs are being met.*
